

SPECIFIC INSTRUCTIONS FOR FACT-FINDING WITH DESTROP-THE-PIE AT THE END OF THE ROUND IF NO AGREEMENT

Specific Instructions for FFCAEXTRA - 5

For the next several rounds, there will be particular procedure used to deal with the possibility that you and your counterpart may not reach an agreement by the end of the round.

Mid-way through the round, if you and your counterpart have not yet agreed on a value of X , then a computerized "suggester" will make a suggestion for you. You do not have to agree upon the suggestion, but it will be made in any event. Bargaining will continue after the suggestion is offered. Should you reach the end of the round without having mutually agreed upon a value of X , you will then be prompted for a final offer. If you and your counterpart's final offers come to agreement, then that is the value of X for the round (if they overlap, then X will be the average of the final offers for that round). If there is still no agreement, then you will both receive \$0 for that round. This does not affect any of your previous earnings, nor does it apply to future earnings (future rounds of the experiment).

When the computer offers a suggestion midway through the round, some values of X are more likely to be suggested than others, but there is a random element to the computer's suggestion of X . To give you some information about this random number generation procedure, below are the last 100 values of X randomly generated by the computer as "suggestions" (the order in which they are shown is irrelevant) using the exact same procedure that would apply in your case. This can be used to give you an idea of more likely and less likely suggestions of X .

522	491	480	493	525	598	450	653	495	537
451	556	365	566	381	513	536	463	560	555
599	513	557	539	628	425	389	501	567	532
523	485	549	543	529	423	517	424	484	517
455	497	547	371	526	484	456	432	461	454
396	437	438	432	432	492	449	539	511	473
474	423	524	553	445	491	429	464	445	539
411	575	461	464	458	437	456	534	497	558
452	519	486	453	411	429	502	434	533	610
535	566	496	522	435	618	531	523	623	526

Again, midway through the round, you will be offered a "suggested" value of X if you have not yet agreed (based on the same random number generation process as generated the table of 100 numbers above). You are not required to agree on this value of X , but it will be offered in any event. If you and your counterpart have not reached agreement by the end of the round, you will be prompted for a final offer. If final offers still do not agree then you both receive \$0 for that round.

If you have any questions, please raise your hand before starting the round. If you do not have any questions, then please click below to start.
