

Auxillary Material for Marshall et al. 2013 JGR - 3D Fault Model

Instructions for Viewing 3D Model

(This file requires Adobe Acrobat 5.0 or later for 3D capabilities)

1) To activate 3D rendering, click the left mouse button in the gray box below.

Warning: This instruction screen will disappear upon activating 3D rendering. To return to the instruction screen, right click on the 3D model and select "disable content."

2) Upon activating 3D, the pdf file will load the 3D model in approximately map view.

3) To change default name labels use the view manager pull-down menu near the top of the screen. Select the view called "map view (fault names)". Labels will disappear upon clicking the mouse.

4) The default view, "map view", can be returned to at any time by clicking on the little house icon.

3D Driving Instructions

Rotate: Hold down on left mouse button and move mouse in the direction of rotation.

Zoom in/out: Hold on the right mouse button and move the mouse up and down.

Translate/Move: Hold down on the right and left mouse buttons and move mouse in the direction you wish to move.
